MANAHIL PAKEEZA

Aspiring HR & Customer Support Professional

pakeezamanahil151@gmail.com | +92 314-4957456 | Faisalabad, Pakistan | github.com/ManahilPkz | linkedin.com/in/manahil-pakeeza

PROFESSIONAL SUMMARY

Final-year Computer Science student from FAST-NUCES with a strong foundation in software development, data management, and administrative coordination. Skilled in full-stack and cross-platform development (Flutter, React.js, Node.js), along with excellent communication, stakeholder management, and organisational skills developed through leadership and event management roles. Experienced in coordinating teams, mentoring peers, maintaining accurate records, supporting recruitment and onboarding activities, and handling organisational operations. Proficient in MS 365 and comfortable managing documentation, data entry, customer interactions, and administrative processes. Eager to leverage both technical expertise and people-oriented skills to contribute effectively in HR, Customer Support, or Claims Administration roles.

KEY SKILLS & COMPETENCIES

Collaborated on creative projects requiring cross-functional teamwork and attention to detail

EDUCATION

Bachelor's in Computer Science, FAST-NUCES — 2022 – 2026 | Chiniot-Faisalabad, Pakistan

Intermediate in Computer Science, KIPS College — 2020 – 2022

TECHNICAL SKILLS

Languages & Frameworks: C++, C, Python, JavaScript, Node.js, Express.js, HTML5, CSS, Bootstrap 5, Flutter, React.js

Databases: SQL, MongoDB, Oracle 11g

Tools & Platforms: MS 365, GitHub, Figma, Visio, Android Studio, VS Code, Postman, Jupyter Notebook, Ubuntu

Teaching Experience: Computer Science Instructor Internee

PROJECTS

INDIELIFE — Cross-Platform Mobile App (Flutter, MongoDB, REST APIs)
Built a multi-service platform connecting users with service providers — designed user flows, managed data models, and coordinated deployment

E-Commerce Shopping Website — Full Stack (Node.js, JavaScript, Bootstrap)
Developed a customer-facing platform with secure login, product listings, and responsive UI focused on user experience

Hospital Management System — Database Project (C#, Oracle 11g)
Designed a record-management system for patient and staff data — directly analogous to HRIS database structures

Flex Management (LMS) — OOP Project
Built a learning management platform with user profiles, interactions, and access control — demonstrating systems thinking applicable to HR software
